

Some useful websites for helping your child with Maths

<http://www.mathszone.co.uk/>

Click on the KS1/KS2 tab at the top and then click on the section you want to look at on the left.

There are numerous games, activities and demonstrations on this site.

<http://www.topmarks.co.uk/>

You can browse by subject and key stage or search for specific topics e.g. addition. Each activity will state the key stages it is suitable for.

www.ictgames.co.uk

Click on Numeracy and then select the topic you are looking for. Then select a game using the description to help you.

<http://nrich.maths.org/public/index.php>

This site has lots of problem solving activities at different levels. It does need time to find your way around it.

I would suggest clicking on 'This month' and have a look at the problems set there. They are changed each month.

There are also parent's booklets for each year group which show the objectives for each year and suggested activities to do at home.
