Ambition and Aspiration for all

Famous IT professionals		Because I love Computing, when I am older, I could be…
	**Charles Babbage –** he designed the first mechanical computer, the Analytical Engine, earning the title "father of computing".	**Video Game Maker (Game Developer) -** Writes code to design the rules, characters, and worlds in your favourite video games. **Cyber Security Guard –** someone who acts like a digital police officer who locks doors and stops computer hackers from stealing private data. **Robot Builder (Robotics Engineer) –** they design smart machines that can explore Mars, clean houses, or build cars. **App Designer (Software Engineer)** - invents phone apps that help people chat, map directions, or listen to music. 
	**Ada Lovelace –** she wrote the first algorithm intended for implementation on Babbage's analytical engine, becoming history's first computer programmer.	
	Alan Turing – he formalized concepts of algorithm and computation with the Turing machine and helped crack wartime codes.	
	**Sir Tim Berners-Lee -** is a British scientist who invented the World Wide Web in 1989. He made it so people could click links to jump between pages on computers, which changed how the whole world shares information and plays online today.	

Ambition and Aspiration for all

Famous figures who shaped Online Safety		Because I love Online Safety, when I am older, I could be…
	**Dr. Kimberly Young:** Founded the Center for Internet Addiction in 1995. She was one of the first psychologists to warn how screen time impacts children's brains and mental health.	**Cyber Security Guard –** someone who acts like a digital police officer who locks doors and stops computer hackers from stealing private data. **Head of AI safety -** generally refers to specific executive and advisory roles overseeing artificial intelligence risk, alignment, and evaluation at major labs, institutes, or organizations. **Robot Builder (Robotics Engineer) –** they design smart machines that can explore Mars, clean houses, or build cars. **App Designer (Software Engineer) -** invents phone apps that help people chat, map directions, or listen to music.
	**Parry Aftab:** A digital safety lawyer who created Wired Safety in 1998, one of the very first organizations dedicated to protecting children from cyberbullying and online predators.	
	**Stephen Balkam:** Founded the Family Online Safety Institute (FOSI). He brought tech companies and governments together to create tools, rules, and guides for safer family browsing.
