Ambition and Aspiration for all

Famous people associated with D&T		Because I love D&T, when I am older, I could be…
	**Yinka Ilori** - Furniture and Product Designer A British-Nigerian designer famous for transforming furniture and public spaces using bright colours, patterns and storytelling. His work is a great example of how design can celebrate culture and identity.	**Architect** – Design amazing buildings. **Engineer** – Solve problems and make things work. **Product Designer** – Invent and improve everyday products. **Fashion Designer** – Design and make clothes and accessories. **Chef / Food Designer** – Create and develop new foods. **Set & Prop Designer** – Create incredible objects and worlds for TV, film and theatre.
	**Sir James Dyson** – Inventor and Engineer A British inventor strongly associated with iterative design, where products are designed, tested, improved and redesigned. Inspiration:*"Mistakes can help us improve our designs.*	
	**Elsie Owusu** – Architect A British-Ghanaian architect who has designed buildings and spaces in the UK and Ghana. She was also a founding member of the Society of Black Architects and has served on the RIBA Council.	
	**Ralf Hotchkiss** - Inventor & Wheelchair Designer After a motorcycle accident, Ralf Hotchkiss became paraplegic and began using a wheelchair. He found that his wheelchair was difficult to use and easily damaged, so he used his engineering and design skills to develop better, stronger and more practical wheelchairs. His work has focused particularly on affordable wheelchairs that can cope with challenging terrain in developing countries.
