Ambition and Aspiration for all

Famous scientists		Because I love Science, when I am older, I could be…
	**Albert Einstein-** Loved imagining impossible questions and was very curious as a child.	**Astronaut**– Travels into space to conduct experiments and explore beyond Earth. **Marine Biologist**– Studies ocean animals like dolphins, sharks and whales. **Forensic Scientist**– Solves crimes by analysing fingerprints, DNA and other evidence. **Vet-** Uses science to keep animals healthy and treat illnesses. **Palaeontologist**– Discovers and studies dinosaur fossils and other ancient life. **Robotics Engineer**– Designs and builds robots that can help. **Medical Research Scientist**– Develops new medicines. **Wildlife Conservationist**– Protects endangered animals and their habitats around the world.
	**Marie Curie-** First person to win two Nobel Prizes in different sciences.	
	**Jane Goodall–** Lived amongst wild chimpanzees and discovered they used tools.	
	**Mae Jemison-** The first black woman in Space. She loved Science as a child.	
	**Kizzmekia Corbett-** Played a key role in developing the Covid 19 vaccine.
